

MALWANDLA HLONGWANE

ICT Graduate: Software Development | Databases | Android | Networking & IT Support

Gauteng, South Africa | 065 883 1240 | MalwandlaHlongwaneICT@outlook.com | [linkedin.com/in/malwandla-hlongwane](https://www.linkedin.com/in/malwandla-hlongwane) | github.com/Malwandla21-ict

PROFESSIONAL SUMMARY

Final-year Diploma in ICT (Applications Development) student at the University of Mpumalanga with broad, hands-on exposure across the ICT stack: full-stack web development, Android app development, relational database design, and networking/IT support fundamentals. Built and shipped three independent applications (a full-stack marketplace, an AI-assisted mobile health app, and a desktop management system) and practically configured a two-campus WAN. Comfortable moving between frontend, backend, mobile, and infrastructure work, well suited to a generalist junior ICT role, graduate programme, or internship where versatility across multiple technical domains is valued.

TECHNICAL SKILLS

- **Software Development:** Java, JavaScript, PHP, HTML & CSS, SQL; Node.js (Express), REST API design, JWT authentication, MVC/layered architecture, OOP & design patterns
- **Android Development:** Android Studio, XML/Material Design UI, Activities/Fragments & lifecycle, Room Database, SQLite, Retrofit, Firebase, Google Maps API, AlarmManager
- **Databases:** MySQL, SQLite, Room Database; ER modelling, normalization, advanced SQL, transaction management, query optimization, BI & data warehousing, NoSQL/Big Data awareness
- **Networking & IT Support:** OSI/TCP-IP models, IP addressing & subnetting, routing & switching, VLANs, wireless configuration, WAN design (Cisco Packet Tracer), PC/mobile hardware troubleshooting, printer & peripheral support
- **IT Service Management:** ITIL v3 Foundation (service lifecycle, service design, service transition, continual service improvement)
- **Software Engineering Practice:** Requirements engineering, UML system modelling, Agile/Scrum, test-driven development, Git/GitHub

PROJECTS

Taskify: Campus Task & Equipment Marketplace

Tech: Node.js, Express, MySQL, HTML, CSS, JavaScript

Full-stack web app for posting tasks, hiring services, and renting equipment within a secure campus marketplace. Implemented JWT authentication, a full task lifecycle system, equipment booking/return tracking, a ratings/reviews system, simulated escrow payments, and RESTful APIs connecting frontend and backend.

GitHub: github.com/Malwandla21-ict/taskify

HealthWise: AI-Based Symptom Checker App

Tech: Java, Android Studio, Retrofit, Room Database

Android health app that matches user-selected symptoms to possible conditions using an integrated AI API for dynamic explanations. Includes an interactive chatbot, Room Database for history storage, and AlarmManager-based reminders.

GitHub: github.com/Malwandla21-ict/HealthWise

FUEL SA: Fuel Station Management System

Tech: Java, JavaFX, FXML, Scene Builder, CSS

Desktop fuel station management application with a JavaFX GUI, built using OOP principles with modular separation of logic, controllers, and UI.

GitHub: github.com/Malwandla21-ict/FuelSA

Two-Campus WAN Design & Configuration

Tools: Cisco Packet Tracer

Designed and configured a two-campus WAN with 5 departments per campus (5 computers each), separate student/staff/guest wireless networks, and verified inter-campus connectivity via successful ping tests.

RELEVANT COURSEWORK

- **Application Development:** Android (Java, Android Studio, SQLite/Room, Firebase); Jakarta EE (Servlets, JSF, REST services); Web Development (PHP, MySQL, JavaScript)
- **Information Systems III:** ER modelling & normalization, advanced SQL, transaction management, distributed databases, Big Data & NoSQL, business intelligence
- **Computing Theory & Networking:** CompTIA A+ (hardware/support) and Network+ (routing, switching, subnetting, wireless, WAN design) syllabi
- **Software Engineering:** SDLC, requirements engineering, UML, Agile/Scrum, software testing
- **IT Service Management:** ITIL v3 Foundation (service lifecycle, service design, transition, continual improvement)

EDUCATION

Diploma in Information and Communication Technology (Applications Development)

University of Mpumalanga, Expected Completion: 2026 | Average: 75–78%
