

MALWANDLA HLONGWANE

Junior Android / Mobile App Developer

Gauteng, South Africa | 0658831240 | MalwandlaHlongwaneICT@outlook.com | [My linkedIn](#) | [github.com/Malwandla21-ict](#)

PROFESSIONAL SUMMARY

Final-year ICT (Applications Development) student at the University of Mpumalanga with practical experience building Android applications from the ground up — UI design, local data persistence, third-party API integration, and background services. Built HealthWise, an AI-assisted symptom-checker app, covering the full Android development lifecycle from interface design through to deployment-ready builds. Seeking a junior Android/mobile developer or internship role to grow professional mobile development experience.

TECHNICAL SKILLS

- Languages: Java, Kotlin (module-level), SQL
- Android: Android Studio, XML layouts & Material Design, Activities/Fragments & lifecycle management, event handling & intents, AlarmManager, RecyclerView
- Data & Networking: Room Database, SQLite, SharedPreferences, Retrofit (REST API consumption), JSON parsing, Firebase integration
- Other: Google Maps API & location services, multimedia integration, Git/GitHub, app testing, debugging & performance profiling, signed APK/AAB packaging
- Software Engineering: Object-oriented design, MVVM/MVC patterns, UML modelling, Agile/Scrum practices

FEATURED PROJECT

HealthWise — AI-Based Symptom Checker App

Tech: Java, Android Studio, Retrofit, Room Database

Mobile health application allowing users to check symptoms and receive possible conditions with AI-generated explanations.

- Developed symptom selection and condition-matching logic for user diagnosis assistance
- Integrated an AI API to generate dynamic medical explanations for users
- Built an interactive chatbot for user engagement and guidance
- Implemented Room Database for storing user history and previous results
- Developed reminder functionality using Android AlarmManager
- Designed responsive, user-friendly mobile interfaces using XML layouts

RELEVANT COURSEWORK

- Android Application Development: Android Studio & SDK setup, application architecture and lifecycle, XML/Material Design UI, event handling & navigation (intents, listeners), SharedPreferences & SQLite/Room, multimedia & location-based services, REST/Firebase integration, testing, debugging, and Play Store deployment
- Application Development II (Java): OOP, GUI development, arrays/collections, recursion, searching & sorting algorithms, file I/O and JDBC database access
- Software Engineering: SDLC, requirements engineering, UML system modelling, design patterns, Agile/Scrum, software testing

EDUCATION

Diploma in Information and Communication Technology (Applications Development)

University of Mpumalanga — Expected Completion: 2026 | Average: 75–78%
