

MALWANDLA HLONGWANE

Junior Database Developer / Data-Focused ICT Graduate

Gauteng, South Africa | 0658831240 | MalwandlaHlongwaneICT@outlook.com | [My LinkedIn](#) | github.com/Malwandla21-ict

PROFESSIONAL SUMMARY

Final-year ICT (Applications Development) student at the University of Mpumalanga with a strong grounding in relational database design, from entity-relationship modelling and normalization through to advanced SQL, performance tuning, and emerging NoSQL/Big Data concepts. Applied this knowledge practically by designing and querying MySQL databases for two full production-style applications. Seeking a junior database developer, data analyst, or database administration role to build on this academic and applied foundation.

TECHNICAL SKILLS

- Database Design: Entity-Relationship (ER) modelling, normalization (up to higher normal forms), relational schema design, data modelling (conceptual, logical, physical)
- SQL: Data definition & manipulation, complex queries, joins, relational set operators, SQL functions, stored procedures, transaction processing
- Database Systems: MySQL, SQLite, Room Database (Android), MySQL Workbench
- Advanced Topics: Transaction management & concurrency control, database performance tuning & query optimization, distributed database systems, database security & administration
- Emerging Data Technologies: Big Data & Hadoop concepts, NoSQL (MongoDB, Neo4j), business intelligence & data warehousing, star schemas, SQL analytical functions
- Applied Skills: REST API integration with databases, CRUD operations, backend data architecture

APPLIED EXPERIENCE

Taskify — Campus Task & Equipment Marketplace

Tech: Node.js, Express, MySQL

Designed the relational database schema and query layer behind a full-stack marketplace platform.

- Designed and implemented the MySQL schema supporting users, tasks, bookings, and reviews
- Wrote CRUD queries and integrated them with a RESTful API layer
- Structured data relationships to support a full task lifecycle and equipment booking/return tracking

GitHub: github.com/Malwandla21-ict/taskify

HealthWise — AI-Based Symptom Checker App

Tech: Java, Room Database

Implemented local data persistence for a mobile health application.

- Designed and implemented a Room Database schema for storing user history and previous results

GitHub: github.com/Malwandla21-ict/HealthWise

RELEVANT COURSEWORK

- Information Systems III (Database Systems): ER modelling, advanced data modelling, normalization, SQL programming (beginner to advanced), relational set/join operators, database architecture (file server, client-server, web-based)
- Information Systems III (Advanced Database Concepts): transaction management & concurrency control, database performance tuning, distributed DBMS, database security, Big Data & NoSQL (Hadoop, MongoDB, Neo4j), business intelligence & data warehousing
- Web Development: MySQL database design with PHP (PDO), single- and multi-table queries, foreign keys and joins

EDUCATION

Diploma in Information and Communication Technology (Applications Development)

University of Mpumalanga — Expected Completion: 2026 | Average: 75–78%
